Misael Uribe-Esquivel
Laboratorio De Patologia Clinica
Puente de Piedra 150
Mexico Df 14050
Mexico

Dear Dr. Uribe-Esquivel:

The Commission on Laboratory Accreditation of the College of American Pathologists (CAP) is pleased to inform you that the medical laboratory at Laboratorio De Patologia Clinica Medica Sur in Mexico Df, Mexico, has been awarded accreditation based on the results of an on-site inspection completed on November 15, 2005. Your laboratory, under the direction of Francisco Sanchez-Giron, MD, was recognized for providing quality laboratory services.

Laboratorio De Patologia Clinica Medica Sur is one of a select group of laboratories that has been evaluated and found to be in compliance with the CAP accreditation standards - rigorous laboratory standards designed to help ensure quality patient care. The CAP's program is the most respected and recognized laboratory accreditation program in the world and has long been considered the "gold standard" against which others are measured.

Your laboratory is to be commended for this major accomplishment. It is our pleasure to support the mission of organizations like yours.

Sincerely,

R. Bruce Williams, MD
Chair, Commission on Laboratory Accreditation
